A Note on Abbreviations

I have followed the format, style, and conventions of Marine and Walls' 1983 enumeration of the cemetery from *Morgan County Cemeteries*, Volume II. "SS" denotes names of occupants buried together under the same headstone. "FS" is a footstone bearing an inscription, including veterans' markers. "HS" is a common headstone with no individual names, usually with foot markers for each person buried at the headstone. "FHM" is a temporary funeral home marker. Underlining denotes an uncertain, difficult-to-read inscription. My annotations that fall outside a simple description of the cemetery are given in blue.

Sections are my own definitions, and are not always completely clear looking at the cemetery. See the description of sections at <http://www.zdutton.org/cemetery/friendship/>.

(concrete memorial set in a brick base)

[Ben Echols (c. 1833-1881) was a former slave of the James Madison Echols family, who I am told helped build one of the early church buildings, and was honored by the white members of the church with this memorial. The names listed here are his children; I do not believe they are all buried here. But growing up, my grandfather Milton Aldridge told me that this was an “integrated cemetery,” and there may be other blacks buried in this area.]
